

PREVENTION OF DOMESTIC VIOLENCE

This submission is motivated because of the miserable marriage experienced by my grandmother whose firstborn was a girl (my mother) and not the desired son.

It is now known that the sex of a child is determined by the father (see attached). There are cultures in Australia where a son is desired and the mother is blamed if it is a daughter.

I propose that it be compulsory in say year 10 for the biology of sex determination be taught.
